CORE EXPERTISE

- **Frontend Architecture & Strategy**: Micro-frontends, platform standardization, design systems, state management, SSR/CSR trade-offs
- **Web & UI Technologies**: React, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind
- **Performance & Scale**: Core Web Vitals, bundle optimization, lazy loading, caching strategies, SEO
- **Quality & Delivery**: Jest, Cypress, TDD, CI/CD pipelines, automated testing
- **Technical Leadership**: Architecture reviews, mentorship, cross-team influence, technical roadmap ownership
- **AI-Driven Development**: AI-assisted coding, testing automation, developer productivity tooling

ARCHITECTURAL & PLATFORM IMPACT

- Defined frontend standards and architectural patterns adopted across multiple teams
- Led large-scale migrations from legacy UI stacks to modern React-based architectures
- Balanced performance, maintainability, and delivery speed through pragmatic system design decisions

EDUCATION

Master of Computer Applications (MCA)
Acharya Nagarjuna University | 2009 – 2012

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner

SUMMARY

Principal Frontend Engineer with **10+ years of experience** designing, scaling, and modernizing **large-scale, high-traffic web platforms**. Proven track record of defining frontend technical vision, architecting complex systems, and acting as a force multiplier across teams. Deep expertise in **frontend architecture, performance optimization, micro-frontends, design systems, and AI-driven development practices**. Trusted technical leader known for mentoring engineers, influencing cross-functional stakeholders, and delivering durable systems with measurable business impact.

PROFESSIONAL EXPERIENCE

Amazon — Frontend Engineer II

Toronto, Canada | Aug 2022 – Present

- **Defined frontend architecture and execution strategy** for a mission-critical labor planning platform supporting **millions of daily transactions**, driving a **23% improvement in operational efficiency**.
- Architected and rolled out a **scalable micro-frontend platform**, enabling independent deployments across teams and reducing integration timelines by **30%**.
- Led frontend **performance optimization initiatives** (code splitting, caching, render optimization), reducing page load times by **30%** and contributing to a **15% increase in customer satisfaction**.
- Acted as **frontend technical lead and mentor** for a team of engineers, scaling impact through shared patterns, architecture reviews, and ownership boundaries.
- Partnered closely with product, UX, and backend leaders to **shape scope, influence roadmaps, and align technical decisions with business outcomes**.
- Established and enforced **frontend engineering best practices**, including testing strategies, CI/CD automation, accessibility (WCAG), and AI-assisted development, resulting in: **25% reduction in production defects** and **38% improvement in delivery velocity**

GE Vernova — Senior Staff Software Engineer, Frontend

Bengaluru, India | Apr 2014 – Aug 2022

- Served as **senior technical authority** for frontend systems across multiple applications and teams, influencing long-term architectural direction.
- Architected and implemented a **responsive, reusable design system**, improving cross-platform consistency and driving a **20% increase in mobile engagement**.
- Led and mentored **10+ engineers**, raising the frontend bar through design reviews, technical coaching, and standardized development practices.
- Introduced a **component-driven architecture** that modularized the codebase and reduced feature development time by **35%**.
- Led modernization efforts to migrate legacy frontend systems to **modern frameworks**, significantly improving scalability, performance, and maintainability.
- Drove UX-led improvements through customer feedback analysis, resulting in a **17% increase in customer satisfaction**.
- Collaborated with architects, backend teams, and product leaders to deliver complex, cross-cutting features aligned with platform goals.
